INTERNATIONAL KAPLANLAR REFRIGERATION CARTOON COMPETITION/Turkey
 -

31/12/2017 29x21 3
 cartoon@kaplanlar.com

.....
SPECIFICATIONS

Theme: Environment and Climate Change

“Driven by technological development and economic growth, our world is subject to constant changes.

The problems of global warming, deforestation, extinction of plant and animal species, depletion of natural resources and pollution are all associated with these changes, issues which threaten life on the planet, its nature and our future.

“Aware of the changes since it was founded, Kaplanlar Refrigeration has always striven to develop eco-friendly products and services, to reduce carbon footprints and support sustainable living. In fact, we believe that the cooling and refrigeration sector can make a positive contribution to the challenge of getting climate change under control. “Therefore, with the aim of keeping the public's attention focussed on environmental issues, Kaplanlar Refrigeration announces its 'International Cartoon Competition' on the theme of 'Environment and Climate Change.’”
